

Take Concept to Reality: The Advantages of PCQ Glazing Technology

5 Ways to Improve Your Design (... & there are many more PCQ Technologies advantages.)

LIGHTWEIGHTING

©KYBURZ Switzerland AG

SCRATCH RESISTANCE

Quantum[®] Hardcoating has withstood over one million wet/dry windshield wipes in performance testing.

PCQ products are **50 times more resistant to impact** than either tempered or laminated glass, and 20 times more resistant to impact than acrylic products.*

SPECIFIC SHAPES

The flexibility for Custom Forms and Unique Solutions – Superior forming that glass products (termed automotive, tempered, laminated or other) cannot achieve.

*Statistics are based on regulatory testing methodologies.

WEIGHT COMPARISONS

PCQ products are **less than one-half** the weight of glass when compared volume-to-volume – equal thicknesses and equal dimensions.

IMPACT RESISTANCE

PCQ Technologies has become the world's leading manufacturer of high grade, optical quality polycarbonate glazings for use in multiple vehicle applications.

Through extensive research and stringent testing, PCQ Technologies has developed end-to-end manufacturing solutions to provide glazings for E-vehicle markets worldwide. Top grade polycarbonate with Quantum[®] hardcoating delivers a finished product with abrasion resistance that meets or exceeds DOT and ECE R43 standards.

This combination of material, coating, UV blockers, graphics and extensive forming abilities delivers a total solution that automotive glass cannot.

PCQ Technologies has the innovative design, engineering and manufacturing expertise to stand behind their claim: The Worldwide Leader in Lightweight Polycarbonate Vehicle Glazing Technology[™].

We invite you to meet with us at the many trade shows and conferences at which we exhibit or contact us directly. These trade shows are listed on our website.

PCQ Technologies Delivers Benefits for ALL ASPECTS of the Product Development Cycle -

DESIGN FLEXIBILITY & STYLING SOLUTIONS

• Creative flexibility enhanced by over 85 years of forming experience by PCQ Technologies

• Maximum part size up to 183cm x 275cm x 100cm

PRODUCTION EFFICIENCY

• Incorporate structural support into the polycarbonate design to reduce/eliminate metal support frames

COST ADVANTAGES

• Your company will benefit from easier, faster production assembly

PRODUCT PERFORMANCE

• Hardcoated polycarbonate glazings deliver lower weight by volume than glass

• Simplified stocking

• Smaller parts lists & bills of material simplifies stocking

and supply chain

PCQ Technologies polycarbonate glazings are adaptable to natural vehicle flex

 Structural strength enhanced by form

> • Differentiate your brand with limitless encapsulated graphics

• Let PCQ Technologies be your single glazing solution source

• Benefit from our engineering and manufacturing experience in polycarbonate
